SUMMARY

Full-Stack Developer with hands-on experience in building scalable web applications using React, Next.js, Node.js, JavaScript, and MongoDB. Experienced in developing RESTful APIs, integrating AI-powered solutions, and building responsive user-centric applications. Strong problem-solving and debugging skills with a passion for learning new technologies and delivering clean, efficient, and maintainable software solutions.

EXPERIENCE

Software Development Intern - TensorKode, USA, Sep-Dec 2025 *Technologies Used: Python, OpenAI GPT-4 API, Docker, REST API, ERP Integration*

Developed an AI-powered multi-agent system (Planner, Coder, Debugger, Reviewer) using the OpenAI GPT-4 API to automate ERP code generation, testing, and optimization from natural language input. Integrated REST APIs and Python automation to streamline ERP workflows, reducing development time by nearly 80% while improving code quality, debugging, and maintainability.

Research Intern - BMS College of Engineering, Jan-May 2026 *Technologies Used: OMNeT++, SUMO, Veins, TraCI, Python, Data Analysis*

Developed and analyzed a VANET-based RSU handoff prediction system using SUMO and OMNeT++. Integrated traffic and network simulators through TraCI, implemented vehicle-to-infrastructure communication models, and performed data preprocessing, debugging, and performance analysis to improve intelligent handoff decision-making.

PROJECTS

EasyCheesy – Full Stack Food Ordering Platform — [GitHub](#)

- Built a full-stack food ordering platform using **Next.js, React, Node.js, MongoDB, and Tailwind CSS**.
- Implemented secure authentication, role-based access control, RESTful APIs, and an admin dashboard for menu and order management with MongoDB integration.
- Designed a responsive user interface, integrated backend APIs, and optimized application performance for a seamless ordering experience.

Calmpanion – Mental Health Awareness Platform — [GitHub](#)

- Developed a full-stack mental health platform using **Next.js, React, Node.js, and MongoDB**.
- Implemented secure authentication, appointment scheduling, blogging, and donation management features.
- Built responsive UI components and integrated RESTful backend services to deliver a seamless user experience.

InsightfulCV – AI Resume Analyzer — [GitHub](#)

- Built an AI-powered ATS resume analyzer using **Next.js, Supabase, and Mistral AI**.
- Developed resume evaluation, job matching, and AI-powered feedback generation using Mistral AI APIs.
- Integrated secure resume storage with real-time analysis through an intuitive user interface.

Hybrid Deepfake Detection System — [GitHub](#)

- Developed a hybrid deepfake detection system using RGB and frequency-domain feature extraction.
- Designed and implemented a hybrid architecture combining **EfficientNet-B4** and Transformer encoders.
- Performed dataset preprocessing, model training, evaluation, and optimization, achieving over **95% accuracy**.

TECHNICAL SKILLS

Languages	JavaScript, Python, Java, SQL, HTML, CSS, C++
Frameworks	React.js, Next.js, Node.js, Tailwind CSS
Databases	MongoDB, PostgreSQL, MySQL
Tools & Concepts	Git, GitHub, VS Code, Docker, Prisma, Jupyter Notebook, Google Colab, REST APIs, API Integration, Data Structures & Algorithms, OOP, DBMS, Software Engineering, Machine Learning, Artificial Intelligence, LLM Integration, Computer Networks, OMNeT++, SUMO, Veins, TraCI

EDUCATION

2022-2026 B.E in Computer Science and Engineering, **BMS College of Engineering**

2021-2022 Mahesh PU College (Integrated with Allen) 11th and 12th

KCET Rank: 1257
